GERMANTOWN HILLS

Village of Germantown Hills Residents:

If you are a part of the Village's current electrical aggregation program, you will be receiving a letter from Ameren informing you that the current aggregation program is expiring.

The aggregation program will expire with the May 2026 meter reads. For the next few months (May meter read start until the July meter read) those residents that were on the aggregation program will be going back to the Ameren bundled rates automatically.

Our consultants are making ongoing efforts to find the best rate possible. The consultants are optimistic that a better rate will be found in the next 60 days. The Village will update the Village residents about the electrical aggregation program as information becomes available.

These are the same consultants that have been very successful in saving the Village residents money over the past four years.

Thanks.
