

# Village of Germantown Hills Residents

All residents of The Village of Germantown Hills previously enrolled in the Municipal Aggregation Program will now utilize Ameren Illinois as their electric supplier until May 2027. Compared to Ameren Illinois' default rates, the current market rates were non-competitive. Returning to the Ameren Illinois default rate is the best financial option for residents right now. Our Energy Consultant will continue to actively monitor the market as we move forward.

## Key Points:

**No Action Needed:** Residents do not need to do anything to return to the Ameren Illinois rates as the Municipal Aggregation Program has expired and you will return to Ameren Illinois by default.

**The "Why":** The Municipal Aggregation contract is expiring, and no alternate supplier was found to provide a lower rate than Ameren Illinois.

**Billing Security:** Residents will continue to receive one bill from Ameren Illinois. Service reliability will remain the same.

**Look Ahead:** The Village's Energy Consultant will continue to monitor Ameren Illinois' rate changes throughout the year to determine if a Municipal Aggregation Program should be considered early next year.
